

9 March 2017

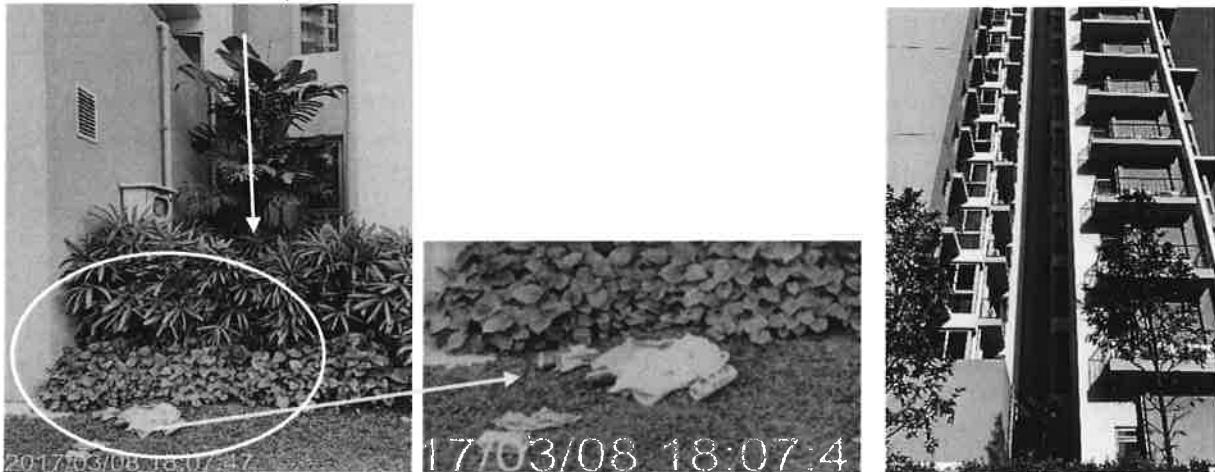

Blk 11 Stack 30 & 33 Residents

HIGH RISE LITTERING

We received feedback from residents, in particular from Block 11 that litters such as 100+ drink cans, plastic bags, food waste and rubbish etc, were thrown out of room windows and/or kitchens. It landed onto planters at level 1 perimeters.

Such inconsiderate acts jeopardize the lives of residents if they are walking below and bottles landed on them. Besides, it will also cause mosquito breeding and invite pest like rats.

Hence, the management is looking into these matters very seriously and will not hesitate to report anyone found carrying out such inappropriate & inconsiderate acts to the relevant authorities for enforcement actions. If you witness any incident, please report them to the Management office. Your identity will be kept confidential. Residents are advised to inform your contractors, and educate domestic helpers and children on the above.

In view of the above incidents, we like to urge all residents to be more considerate by not disposing your litters out of the windows. By practising good habits, we can collective together ensure the safety, cleanliness and hygiene of the estate.

The management is committed to promote clean, safety and communal living and seek your co-operation. Your co-operation is greatly appreciated. Thank you.

Yours faithfully

CH Chan
Property Officer
For and on behalf of MCST Plan No 4409
